Subject: Introduction to potential Class VI applicants

Hi David,

I wanted to introduce you to Tom, Brian and John Zuckerman. The Zuckerman family has been farming in the Delta for over a century now, and Tom has spent an illustrious career representing local water agencies' interests in the notorious water wars that the region is famous for, among several other things. In addition, you will find his sons extremely knowledgeable, sophisticated and agreeable.

The Zuckermans have significant holdings in the Delta, and are also acting as the agent of a "unit" that controls 6,600 acres of land and the underlying mineral rights. They are eager to get a geologic carbon sequestration project going, and want to discuss a potential Class VI injection well permit application with you.

I am connecting you so you can discuss further at your convenience.

Many thanks,

George Peridas, Ph.D.

Director, Carbon Management Partnerships
Lawrence Livermore National Laboratory
